

GROUP SOFTWARE - CHAIR DOOR MEETINGS

Weekly Meeting 19/02/24 1500-1515 SWIoT

🕒 *Wednesday, February 14, 2024 at 15:09:22*

MEETING MINUTES

Initial Meeting 07/02/24

🕒 Friday, February 16, 2024 at 14:26:53

Members (5):  Finn A  George Piper  Jack Hales  James Sadler  Sam Arrows

Attendance: James, Jack, George, Sam, Finn

Duration: 1.5 hours

Meeting Content:

- create Kanban board on Trello
- brainstorm initial ideas for project
 - Ideas:
 - carpooling app with journeys around Exeter being less points than journeys home
 - trading app to reduce buying new things
 - strava integration
 - biodiversity photography competition app with polling to determine the winner
 - treasure hunt app around campus with quiz at the end based on the checkpoints; uses GPS to track that you visited a location
 - sustainability quizzes with levelling up to higher quizzes based on performances
 - daily quizzes; useful as if you don't hit a weekly points threshold, you get eliminated
 - First sprint potential goals:
 - create player and game keeper levels of login
 - establish the database and tables; to be done in MySQL
 - daily quiz
 - point system
 - game keeper is an interface to create tasks such as moving rubbish from one location to another, i.e. glass bottles. use an example in conference

Actions for Next Meeting:

- refine and develop the initial ideas
- aim to use the MoSCoW classification during the next meeting and assign first tasks on the Kanban board

Date of Next Meeting: 11/02/24

Meeting 11/02/24

🕒 Friday, February 16, 2024 at 14:27:28

Members (5):  Dan Harkness-Moore  Finn A  George Piper  Jack Hales  James Sadler

Attendance: James, Jack, George, Dan, Finn

Duration: 45 minutes

Meeting Content:

- create GitHub repo
- create goals for first sprint using MoSCoW
 - must have:
 - player and game keeper levels of login
 - database using MySQL
 - daily quiz
 - point system
 - monthly leaderboard with friends/people on course
 - prizes for top scores
 - treasure hunt around campus
 - tasks at different locations
 - QR codes to show you've been there and access tasks
 - quizzes
 - should have
 - carpooling to reduce car usage and emissions
 - trading app to reduce buying new things
 - could have
 - biodiversity photography competition app with polling to determine the winner
 - Strava integration to track walking/cycling etc
 - won't have
 - AR tasks at locations
 - users recording themselves putting rubbish in bins/recycling
 - AI to reduce the burden on game keepers
- add features to Kanban board

Actions for Next Meeting:

- ensure GitHub linked to Trello for each user for commit/issue tracking
- prepare for meeting with Solomon

Date of Next Meeting: 12/02/24, 14:45, SWIoT with Solomon

Meeting 12/02/24

🕒 Friday, February 16, 2024 at 14:34:45

Members (6):  Dan Harkness-Moore  Finn A  George Piper  Jack Hales  James Sadler

 Sam Arrows

Attendance: James, Jack, George, Dan, Finn, Sam, Solomon :)

Duration: 15 minutes

Meeting Content:

- discuss where we are with the project
 - planning complete
 - commencing development

Meeting 16/02/24

🕒 Saturday, February 17, 2024 at 16:19:01

Members (6):  Dan Harkness-Moore  Finn A  George Piper  Jack Hales  James Sadler

 Sam Arrows

Attendance: James, Jack, George, Dan, Finn, Sam

Duration: 2 hours

Meeting Content:

- develop specifications for first programming tasks
- implement basic pages and database
- assign tasks for the weekend to:
 - implement player and game keeper logins
 - develop basic webpage layout
 - create database tables
 - note a change to SQLite for sprint 1 and to PostgreSQL for sprint 2 - more details below

“Changed to SQLite for sprint 1 as is easier to implement and use than setting up a server. Will use PostgreSQL instead of MySQL as it is recommended over MySQL for integration with Django projects. Reasoning for using different management systems to SQLite is due to limitations in having concurrent connections in SQLite which could impair app performance, i.e. multiple game keepers won’t be able to upload quizzes, treasure hunts, activities simultaneously due to only one connection being able to be open in SQLite - not a problem for PostgreSQL or MySQL.”

Meeting 19/02/24

🕒 Thursday, February 22, 2024 at 11:36:48

Members (6):  Dan Harkness-Moore  Finn A  George Piper  Jack Hales  James Sadler

 Sam Arrows

Attendance: James, Jack, George, Dan, Finn, Sam

Duration: 30 minutes

Meeting Content:

- meant to be weekly meeting with Solomon but he left before coming to our group
- we discussed between ourselves recent progress

Meeting 22/02/24

🕒 Thursday, February 22, 2024 at 11:38:31

Members (6):  Dan Harkness-Moore  Finn A  George Piper  Jack Hales  James Sadler

 Sam Arrows

Attendance: James, Jack, George, Dan, Finn, Sam

Duration: 1 hour

Meeting Content:

- continue development for database which is the main focus as it allows the frontend to be implemented
- set goals to finish database design by end of the weekend

Date of Next Meeting: Saturday 24th February

Meeting 24/02/24

🕒 Saturday, February 24, 2024 at 17:16:15

Members (4):  Dan Harkness-Moore  George Piper  Jack Hales  James Sadler

Attendance: James, George, Jack, Dan

Duration: 2.5 hours

Meeting Content:

- Restructured the project to utilise multiple different apps

Date of Next Meeting: Monday 26th February

QR Codes

🕒 Monday, February 26, 2024 at 11:50:08

Members (2):  Finn A  Sam Arrows

Need to read into the qr code libraries and how to generate them based on GPS location

SPECIFICATION DONE (4)

Treasure hunt around campus

Must have

Application code

🕒 Friday, February 16, 2024 at 14:54:13

Map with pins where qr codes are

Table of qr codes and their location

Link of qr code to a quiz/game

Gamemakers able to add locations to treasure hunt

IMPLEMENTATION DOING (4)

Game Keeper Login

Application code

Must have

🕒 Monday, February 26, 2024 at 09:46:00

Members (4):  Finn A  George Piper  Jack Hales  James Sadler

Add user group to define game keeper permissions.

Attachments (1):

- User groups for player and gamekeeper added to database: <https://github.com/sadlerjames/Group-Software-Project/commit/7ac240116315c9d09613a0411be6eddef7be6ffd> (<https://github.com/sadlerjames/Group-Software-Project/commit/7ac240116315c9d09613a0411be6eddef7be6ffd>).

Design Dashboard Page

Must have

Application code

🕒 Sunday, February 25, 2024 at 12:07:39

Members (2):  George Piper  James Sadler

Player Login

Must have

Application code

🕒 Monday, February 19, 2024 at 15:06:03

Members (3):  Finn A  Jack Hales  Sam Arrows

Add user group to define player permissions.

Permission list:

- access main pages for treasure hunt, daily quiz, etc
- change username and password

Attachments (3):

- User groups for player and gamekeeper added to database: <https://github.com/sadlerjames/Group-Software-Project/commit/7ac240116315c9d09613a0411be6eddef7be6ffd> (<https://github.com/sadlerjames/Group-Software-Project/commit/7ac240116315c9d09613a0411be6eddef7be6ffd>).
- Added basic user creation/login/password reset: <https://github.com/sadlerjames/Group-Software-Project/commit/cbda71a350b48ee22e337b0de6936c41367e2416> (<https://github.com/sadlerjames/Group-Software-Project/commit/cbda71a350b48ee22e337b0de6936c41367e2416>).
- Added question of the day page: <https://github.com/sadlerjames/Group-Software-Project/commit/fc4c47ae38513ffd14000db153d9cb8add4f14ad> (<https://github.com/sadlerjames/Group-Software-Project/commit/fc4c47ae38513ffd14000db153d9cb8add4f14ad>).

IMPLEMENTATION DONE (4)

Ensure navbar is fully functional for loading user's profile page and returning to the dashboard

Must have

Application code

🕒 Monday, February 19, 2024 at 14:23:55

Members (1):  Sam Arrows

Create initial web pages

Must have

Application code

🕒 Monday, February 26, 2024 at 11:45:19

Members (6):  Dan Harkness-Moore  Finn A  George Piper  Jack Hales  James Sadler

 Sam Arrows

- Homepage
- Login (reset password)
- Register
- Dashboard
- Profile
- Daily Activity
- Treasure Hunt

Added quiz python library

Must have

Application code

🕒 Friday, February 23, 2024 at 16:02:51

Created a quiz library that allows us to create quiz objects and save them to .json files

Attachments (1):

- Added quiz library (to correct file path): <https://github.com/sadlerjames/Group-Software-Project/commit/99394efc4800184a94c550b5ac34a04aa2e6ca21> (<https://github.com/sadlerjames/Group-Software-Project/commit/99394efc4800184a94c550b5ac34a04aa2e6ca21>)

VALIDATION DOING (4)

User authentication and rerouting pages when not logged in

Must have

Application code

🕒 Monday, February 26, 2024 at 14:13:47

Members (2):  Finn A  Sam Arrows

Pages with paths that involve the navbar and thus being logged in won't be displayed if the user isn't actually authenticated and instead, will reroute to the index.html file to let the user login or signup.

Works fine but needs to be pushed. Done in pair-programming style, need to co-author on Git.

VALIDATION DONE

Added some basic bootstrap for login pages

Application code

Must have

🕒 Sunday, February 25, 2024 at 12:06:28

Members (1):  Sam Arrows

Creating base pages with navbar

Must have

Application code

🕒 Sunday, February 25, 2024 at 12:07:04

Members (3):  George Piper  James Sadler  Sam Arrows

Setup Initial Database Tables

Database

Must have

🕒 Sunday, February 25, 2024 at 12:07:49

Members (2):  Dan Harkness-Moore  James Sadler

Create the structure of the initial tables in database

Create database using PostgreSQL

Initial commit of empty Django project

Application code

Must have

🕒 Friday, February 16, 2024 at 14:54:50

Members (1):  Sam Arrows

Attachments (1):

- Empty project commit with MySQL settings: <https://github.com/sadlerjames/Group-Software-Project/commit/2657c56153576295ab8f62bc665e72aeac3c59bb> (<https://github.com/sadlerjames/Group-Software-Project/commit/2657c56153576295ab8f62bc665e72aeac3c59bb>)

Create backend admin dashboard

Application code

Must have

🕒 Friday, February 16, 2024 at 14:55:03

Members (1):  Jack Hales

Attachments (1):

- Created admin page: <https://github.com/sadlerjames/Group-Software-Project/commit/08ae8c914be4f98987a35844a611b5293caa87bc> (<https://github.com/sadlerjames/Group-Software-Project/commit/08ae8c914be4f98987a35844a611b5293caa87bc>)

Revert to using SQLite3 for development so it can be run locally

Must have

Database

🕒 Friday, February 16, 2024 at 14:54:57

Members (1):  Jack Hales

MySQL server not setup, so using SQLite3 for development. Decision also made to use PostgreSQL rather than MySQL for production.

Attachments (1):

- Revert to SQLite3 for development: <https://github.com/sadlerjames/Group-Software-Project/commit/a8ac213a59ed9221fbc33e7afce2c73219430db7> (<https://github.com/sadlerjames/Group-Software-Project/commit/a8ac213a59ed9221fbc33e7afce2c73219430db7>)

Added basic settings configuration for a MySQL database

Database

Must have

🕒 Friday, February 16, 2024 at 14:55:02

Members (1):  Sam Arrows

Added settings for a locally stored MySQL server for a file called mydb
Need to make a database which we can all edit and access, whether stored on a public server or kept in repo - databases aren't my strength so need some help on it

Attachments (1):

- Empty project commit with MySQL settings: <https://github.com/sadlerjames/Group-Software-Project/commit/2657c56153576295ab8f62bc665e72aeac3c59bb> (<https://github.com/sadlerjames/Group-Software-Project/commit/2657c56153576295ab8f62bc665e72aeac3c59bb>)
